TEST STRATEGY

Nathan Share

Date of test	Component to be tested	Type of test to be carried out	Prerequisites and dependencies
10/04/2026	Test Register System	Black Box Testing -> Unit Testing, Integration Testing, Security Testing	**Data Inputs Needed** *Email Address* Valid – HelloWorld123@Gmail.com Invalid – InvalidAddress@Gmail Erroneous – ';#['#;'[#];'! *Password* Valid – Password1! Invalid – Password Extreme Valid – Password1_3456! Extreme Invalid – Password!123456! **Prerequisites** No Prerequisites **Test Plan** The tester will use combinations of valid, invalid, extreme and erroneous test data supplied above to comprehensively stress-test the validation and efficiency of the Register Function
10/04/2026	Test Login System	Black Box Testing -> Unit Testing, Integration Testing, Security Testing	**Data Inputs Needed** *Email Address* Valid – HelloWorld123@Gmail.com Invalid – InvalidAddress@Gmail Erroneous – ';#['#;'[#];'! *Password* Valid – Password1! Invalid – Password

			Extreme Valid – Password1_3456! Extreme Invalid – Password!123456! **Prerequisites** No Prerequisites **Test Plan** The tester will use combinations of valid, invalid, extreme and erroneous test data supplied above to stress-test the Login System similarly to the register system.
10/04/2026	Test Register (Google) System	Black Box Testing -> Unit Testing, Integration Testing	**Data Inputs Needed** No data inputs needed. **Prerequisites** Must have integrated Google Login **Test Plan** Tester will attempt to register anew with a Google account
10/04/2026	Test Login (Google) System	Black Box Testing -> Unit Testing, Integration Testing	**Data Inputs Needed** No data inputs needed. **Prerequisites** Must have integrated Google Login **Test Plan** Tester will attempt to log in to their pre-registered Google account
10/04/2026	Test Nav Bar	Black Box Testing -> Integration Testing, Unit Testing	**Data Inputs Needed** No data inputs needed.

			Prerequisites Must have completed the navigation bar functionality and the linked pages must also exist and be completed. **Test Plan** Tester will navigate through the navbar to verify correct page loads. Example: Clicking on "Contact Us" should load the Contact Us page.
10/04/2026	Test Log Out	Black Box Testing -> Integration Testing	**Data Inputs Needed** No data inputs needed. **Prerequisites** Log in system must first work effectively, whether via google or email. **Test Plan** Tester will attempt to log out of their account after logging in.
13/04/2026	Test Basket	White Box Testing, Black Box Testing -> Integration Testing	**Data Inputs Needed** No data inputs Needed. **Prerequisites** Must have created Basket Menu Must have seeded products and shops databases **Test Plan** Tester will attempt to view their empty basket and add a number of products of varying quantities to it.
13/04/2026	Test Order Creation	White Box Testing, Black Box Testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have Created Orders Page

			Test Plan Tester must test that their basket information is transferred to the order screen upon clicking "Create order." This test is purely for the carrying over of item quantities and consistency.
13/04/2026	Test Order Field Validation	White Box Testing, Black Box Testing -> Unit Testing, Integration Testing, Security Testing	**Data Inputs Needed** *Email Address* Valid – HelloWorld123@Gmail.com Invalid – InvalidAddress@Gmail Erroneous – ';#['#;'[#];'! *Cardholder's Name* Valid – John Smith Invalid – Bloke2123 Erroneous – '#;'#;#'; *Card Number* Valid – 1234 5678 9012 3456 Invalid – 1245 Erroneous – hello Ex. Invalid – 1234 5678 9012 345 *Expiration* Valid – 11/28 Invalid – 10/25 Erroneous – hello *CVC* Valid – 123 Invalid – 12345

			Erroneous – hello Ex. Invalid – 1234 *County* Valid – West Midlands Invalid – hello Erroneous – 123 **Prerequisites** Must have created Orders Page **Test Plan** Tester will work through fields one by one, individually testing the validation in each. Eventually, tester will try all fields as valid to attempt register their mock details.
13/04/2026	Test User Role Logins	White Box Testing, Black Box Testing -> Unit Testing	**Data Inputs Needed** *Email Address* Valid – Admin@test.com Valid – Staff@test.com *Password* Valid – Admin@123 Valid – Staff@123 **Prerequisites** Must have seeded User Roles **Test Plan** Tester will use each of these login pairs to test logging in as a staff or admin user, allowing them to access and navigate through pages that they previously wouldn't have access to, like the staff dashboard.

15/04/2026	Test Page Resizing	Black Box Testing -> Integration Testing	**Data Inputs Needed** No Data inputs needed **Prerequisites** No Prerequisites **Test Plan** Tester will try resizing the browser window to see how the page elements adapt and change with the size.
15/04/2026	Test Shop Creation	White Box Testing, Black Box testing -> Unit testing	**Data Inputs Needed** *Shop Name* Valid – Ye Olde Farmshoppe Erroneous – []'#123 *Email Address* Valid – HelloWorld123@Gmail.com Invalid – InvalidAddress@Gmail Erroneous – ';#['#;'[#];'! *Delivery/Pickup* Valid – True/True Valid – False/True Valid – True/False Invalid – False/False **Prerequisites** Must have created Producer Dashboard

			Test Plan Tester will fill in each field to test validation of fields in the shop creation menu. Tester will also view the shops menu after creating a shop to see if it has appeared in the database.
15/04/2026	Test Product Creation	White Box Testing, Black Box Testing -> Unit testing, Integration Testing	**Data Inputs Needed** *Product Name* Valid – Fresh Milk Erroneous – ‘;’;’;’1231232 **Prerequisites** Must have created Producer Dashboard **Test Plan** Using the various fields in the Product creation menu, Tester will create a mock product including price, linked shop, and product name.
15/04/2026	Home page	White Box Testing, Black Box Testing -> Integration Testing, Unit Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Visual layout and CSS of homepage must be complete **Test Plan** Testing functionality of buttons, integration of navbar links and situation on the page. Any components on the homepage are fit correctly and colours are assigned where they are intended to be.
15/04/2026	Search features	Black Box Testing -> Integration testing	**Data Inputs Needed** User can search any term to test if search terms are accurately filtering out irrelevant products **Prerequisites** Must have completed the CSS for homepage and placed the search bar.

			Test Plan Tester will attempt to search a number of terms to test the filtering system of the website.
15/04/2026	Sorting/Filtering Features	Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Completed the sorting and filtering features in at least one page **Test Plan** Tester will attempt to test the sorting and filtering systems to see if they work accurately and effectively
15/04/2026	Categories page	White Box testing, Black Box testing -> Integration testing, Unit testing	**Data Inputs Needed** No Data input needed **Prerequisites** Must have completed CSS and HTML coding for the Categories page. **Test Plan** Tester will view and verify the tags system of the Categories page and will make sure that each category card functions as a link to the correct categorised filter of the products page.
15/04/2026	Account Details Page	White Box testing, Black Box testing -> Unit Testing, Security Testing	**Data Inputs Needed** No Data Inputs Needed **Prerequisites** CSS and HTML for the Account Details page must be completed **Test Plan** Tester will attempt to utilise the Account Details page to make sure that it functions entirely and is effective and coherent to navigate for the average user.

15/04/2026	Why Buy Local? Page	Black Box Testing -> Unit Testing	**Data Inputs Needed** No Data inputs needed **Prerequisites** CSS and HTML for the Why Buy Local? Page must be completed **Test Plan** Tester will view the page and ensure that any links and images are situated correctly within the page and not blocking any text. Also that text is readable and that the page is compatible with accessibility settings, if they are integrated by this point.
15/04/2026	Contact Us Page	White Box Testing, Black Box testing -> Integration Testing, Security Testing	**Data Inputs Needed** No Data Inputs needed **Prerequisites** CSS and HTML for the Contact Us page must be complete and a link to it must be included somewhere on the site. **Test Plan** Tester will access the Contact Us page to ensure that access is smooth and works as expected, such as links going to the correct pages, Nav Bar and footer integration, or page loading speeds being industry standard.
15/04/2026	Footer Bar	Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Footer Bar HTML/CSS and connecting links must be completed, along with linked pages being created to some standard **Test Plan**

			Tester will test each link on the footer bar to ensure that they all direct to the correct locations without issue. Any external links on the footer bar must also be validated.
15/04/2026	FAQ Page	Black Box Testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** CSS and HTML for the FAQ page will need to be completed before this test can be done **Test Plan** Tester will test all access points to the FAQ page as well as all links leading from the FAQ page to ensure that all lead to the correct places and are loaded without issue and at a high speed.
16/04/2026	Test Featured Page	White Box Testing, Black Box testing -> Unit testing, Integration testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have completed CSS and HTML for featured products page and seeded products database **Test Plan** Tester will navigate to the featured page and ensure that the page loads as intended, quickly and efficiently. This includes any visual calls from the database.
16/04/2026	Test Featured Rating System	White box testing, Black Box Testing -> Integration testing	**Data Inputs Needed** Tester must click on both thumbs up and down buttons **Prerequisites** Must have created featured products page and seeded products database

			Test Plan Tester will test both the likes and dislikes, to ensure that the system works, and that when the user clicks like, the value goes up by 1, and the opposite for dislike.
16/04/2026	Test Password Hashing	White Box testing -> Security Testing, Unit Testing	**Data Inputs Needed** No Data Inputs Needed **Prerequisites** Must have access to the SQL Database **Test Plan** Tester will view the backend SQL database and ensure that passwords stored there (even from seeded users) are hashed in a secure way.
16/04/2026	Test Producer Dashboard	White box testing, Black box testing -> Integration testing, Unit testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Staff seeded user role must be completed and Producer Dashboard HTML and CSS must be completed. Producer Dashboard must be linked to the Staff User role **Test Plan** Tester will ensure that only a staff user can gain access to the producer dashboard, and that links to and from the dashboard all lead to the correct locations as intended.
16/04/2026	Test Email Validation in Shop creation	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** *Email* Valid – Email123@Gmail.com Invalid – Email123@Gmail Invalid – Email123Gmail.com Erroneous – #£&(^!

			Prerequisites Must have completed CSS and HTML Shop Creation screen for Producers **Test Plan** Tester will use data inputs above to test the validation fields of the “Owner Email” field in the Shop Creation screen. This tests that an email address is valid, including an @ symbol and Domain name inclusion.
16/04/2026	Test Boolean Validation in shop creation	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** Delivery – True Pickup – True Delivery – False Pickup – False **Prerequisites** Must have completed CSS and HTML Shop Creation screen for Producers **Test Plan** Tester will use every combination of inputs above (Tr/Tr, Tr/Fa, Fa/Tr, Fa/Fa) to test the validation of what is allowed for a shop to do. Only Fa/Fa should be considered invalid.
17/04/2026	Test User ID Validation for viewing orders	White box testing, Black Box testing -> Integration Testing, Security Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have seeded a few users and test orders to populate the database **Test Plan** Tester will navigate to the “view my orders” as a seeded user account to ensure that they can only see the orders where the user ID matches their own.

17/04/2026	Test Producer Order Denial System	White box testing, Black Box testing -> Integration Testing, Security Testing	**Data Inputs Needed** No Data inputs needed **Prerequisites** Must have seeded orders or created orders as a prototype user Must have completed CSS and HTML for Producer Dashboard page. Must have seeded a staff user or an admin user. **Test Plan** Tester will log in as a staff user and navigate to their producer dashboard, where they will test their ability to deny orders that users have created from their shop.
17/04/2026	Test order Subtotal calculation	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** CSS and HTML for orders page must be completed **Test Plan** Tester will fill a basket with a number of items of their choice, and will then proceed to make an order. They will test that the “Subtotal” field in the orders screen is accurate and is accounting for things like delivery costs where applicable.
20/04/2026	Test Accessibility Settings	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have created accessibility settings menu **Test Plan** User will toggle each of the accessibility settings on the site and navigate through the pages with each enabled to test that they all work as expected on all pages.

20/04/2026	Test Dark/Light Mode	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have created accessibility settings menu **Test Plan** Tester will navigate through each page in dark and light mode to test that all text and colours account for each being enabled.
20/04/2026	Test Colourblind modes	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have created accessibility settings menu **Test Plan** Tester will navigate through each page in each colourblind mode to test that all text and colours account for each being enabled.
20/04/2026	Test Font Resizer	White box testing, Black Box testing -> Integration Testing	**Data Inputs Needed** No data inputs needed **Prerequisites** Must have created accessibility settings menu **Test Plan** Tester will navigate through each page in each font size to test that all text accounts for it being enabled.
